Skills

Javascript	React	Node JS
Express	Nest JS	Next JS
MongoDB	Redux	Apollo
MUI	Hygraph	GraphQL
SAAS	Typescript	Tilda

Languages

Ukrainian (Native)

Russian (Native)

English (Upper Intermediate)

Education

Master's degree (09.1991 - 06.1996)
Kharkiv National University of Radioelectronics

Electronic technics engeneer

MBA (09.2006 - 06.2008)
International Institute of Business, Kyiv

International Financial Management (05.2008)
Swiss Business School

English - B2 (08.2014)
The Language Gallery, London

Interests

Learned programming ATmega and STM32 microprocessors. Studied the basics of C\C++

Interest in radioelectronic

Dmytro Kotykhin

Full Stack Software Engineer

Open minded and well-organized software developer. Enthusiastically study both Frontend and Backend technologies, databases like MongoDB and get a great pleasure from programming and gaining new knowledge. Keen to join the development team, run as a Frontend or Fullstack Developer.
Welcome to my portfolio for full information - https://dmytro-kotykhin.space

Experience

Since March 2022

I have studied Javascript, React, Redux, Node JS, Typescript, MongoDB, Nest JS, Next JS, GraphQL, Material UI, etc. Implemented some educational projects:

- ToDo List - https://mytodolist.fun. Full stack app with MongoDB database. Provide full CRUD operations for users and their tasks. Validation all fields, restore password via email. Sort, search, pagination for task. Use React, Redux, RTK Query, MUI, Typescript, React Hook Form, SaSS, EasyMDE in the Frontend. Have two API versions - first build with GraphQL and Apollo at Frontend and Apollo server at the backend and other use classical Rest API with Nest JS server. Mobile friendly app.
- Coffee shop - https://luckycat.pp.ua. 3-languages online shop with adaptive design and personal page with orders history and personal info. Use admin panel for full CRUD shop and menu items, implemented using React, RTK Query, Typescript, MUI in Frontend, Node JS and Express in Backend, MongoDB database, Telegram notification
- Coffee shop light - https://coffeedoor.space. The light version of the project. Implemented using CMS Hygraph and GraphQL API

All sources can be viewed at https://github.com/DKotykhin

Self-employed (since 11.2017)

CoffeeDoor BrewBar & CoffeeShop, Kharkiv

Management of the 3rd wave coffee shop in the center of Kharkov

Head of Development Department (06.2016 - 09.2017)

"Mafia" restaurant group

Created the company development department, launched the project office, effectively assigned roles, established communications in projects, and implemented a project management system. Created a Brandbook, where collected the entire catalog of the necessary equipment, its technical characteristics, catalog and description of furniture, decor elements, interior items, dishes, uniforms and other necessary solutions for opening restaurants.

Head of Kharkiv-Dnepr Region (09.2006 - 06.2016)

"Mafia" restaurant group

Opened 20 restaurants, including 3 franchised ones. Created a franchise direction in the development of the company and opened the first franchise restaurant. Formed an IT department and developed the entire IT infrastructure of the company. Directly supervised all major projects.
